Languages: Spanish: Native | English: Professional working proficiency (B2-C1) | Portuguese: Intermediate B2 | German: Intermediate B1 (TELC)

Professional Summary

Product Designer with 4+ years designing complex products in retail, payments, and health, after 10 years as a project manager and public policy consultant. Lead designer of the redesign of a point-of-sale platform for 200+ stores (50%+ faster across the catalog-to-order flows, 60–90% fewer synchronization errors, support tickets down 72% in four weeks) and designer of the first design system of a payment terminal management platform. Combines systems thinking, data-informed decisions, and design systems with cross-sector stakeholder facilitation, and uses AI-powered workflows (prompt engineering, reusable prompt library) to accelerate analysis and documentation.

Key Achievements

50%+
faster catalog-to-order-creation flows (ZePOS · Zebrands)

60–90%
fewer synchronization errors across the order creation process

−72%
support tickets in four weeks, from 43 to 12 (Zebrands)

200+
stores, progressive rollout before Buen Fin 2025, no outages

−40%
support and QA tickets vs. the three months before (Insight One)

~20
components in the company's first design system, all implemented

Core Skills

Product Design	End-to-End Product Design, UX Strategy, Product Discovery, Information Architecture, User Flows, Interaction Design, Wireframing, Prototyping, High-Fidelity UI
Research & Validation	User Research, User Interviews, Focus Groups, Journey Mapping, Usability Testing, UX Audits, Research Synthesis, Data-Informed Design
Systems & Platforms	Design Systems, Component Libraries, Accessibility, POS Platforms, Payment Platforms, PCI-DSS, B2B SaaS, Enterprise Workflows
Collaboration & Leadership	Cross-Functional Collaboration, Stakeholder Management, Event Storming, MoSCoW Prioritization, Workshop Facilitation, Executive Presentations, Negotiation, Design Reviews, Developer Handoff, Agile
AI-Powered Workflows	Prompt Engineering, AI-Powered Workflows (Claude Code, ChatGPT, Cursor), Reusable Prompt Libraries

Professional Experience

Product Designer (UX/UI) | Zebrands, Omnichannel Point-of-Sale Platform

Dec 2024 – Apr 2026 | Remote

- Lead designer of the ZePOS redesign after a critical failure affected 200+ stores (the June 2025 Hot Sale outage lasted over 5 hours), in an 18-person team with a part-time design colleague and no dedicated product manager; presented and defended designs to Business, the CPO, and the CTO (8-month project).
- Researched in stores (interviews, observation, and ticket analysis) and diagnosed root causes with Sentry and Grafana; worked with engineering, using Event Storming, to evaluate decoupling the ERP into independent services.
- Redesigned the flows from catalog to order creation: 50%+ faster across all of them and 60–90% fewer synchronization errors across the order creation process.

- Brought Business and Payments together to draw edge cases and agree on conflicting payment and stock rules, and built the training material that explains the agreement to sellers.
- Contributed to the design system, independent of the ERP release cycle, and led design reviews.
- Trained 500+ store employees remotely and delivered Portuguese-language materials for the Brazil launch.

Product Designer (UX/UI) | Agnostiko, Insight One Payment Terminal Management Platform

`Jan 2024 – Jul 2024 | Remote (Mexico, U.S., Venezuela)`

- Redesigned the cloud console for managing payment terminals of multiple brands, for a PCI-DSS-certified company, from the C-level pitch to delivery (7-month project); the first client was a Mexican bank.
- In a team of two designers, led the negotiations with business, product, development and the pilot client, and defended the design decisions.
- Segmented information by user type (32 user paths analyzed across 10 sections) using four research methods (interviews, moderated tests, QA feedback, and a focus group); redesigned 6 modules and defined rules and guided flows for bulk uploads.
- Created the company's first design system, with ~20 components, all implemented.
- Reduced support and QA tickets by 40% versus the three months before the project.

Selected Projects

- **Clue App, Health App UX Case Study (self-initiated, Sep 2023 – Nov 2023):** Researched and redesigned onboarding, home, and tracking in the Spanish version of the app, with a design partner, using 9 moderated tests, 14 surveys, a benchmark of five companies, and unmoderated Maze tests with 29 users (usability score 80/100); reviewed with a lead designer from Clue's first design team.
- **Palm & Rescycle, Circular Economy Startup, Colombia (Mar 2023 – Jul 2023):** Product Designer in a team of three UX/UI designers; redesigned the landing page and key pages over 4 sprints of Design Thinking, with 5 moderated tests and interviews, 24 surveys, a 10-company benchmark, 7 guerrilla tests and 3 usability tests; agreed with the CPO and COO on what was possible and scalable, and the landing page design was adopted.
- **Locusroom, Payments Startup, Chile (2023):** UX/UI design of the end-to-end purchase flow for a payments startup.

Prior Experience

Project Manager & Public Policy Consultant

`2012 – 2022 | Mexico`

- Political communication and open government: INE (communication area, with political media analysis); communication strategy for two parties' gubernatorial campaigns and, later, a congressional caucus communication team; Transparency International Mexico (communications, media relations, and legislative and open-data projects for open contracting, a first exposure to UX).
- 10 years facilitating between sectors, now applied to stakeholder management and user-centered problem-solving.

Education

- UX/UI Design, Laboratoria, LatAm (2023): selective intensive program (50 women per cohort)
- B.A. Social Communication, UAM (2012)
- B.A. Political Science, UNAM (2010)
