

Melany Olivares

UX-UI Product Designer

About Me

Product Designer focused on simplifying complex, high-impact systems such as POS platforms, payment flows, and operational tools used in real-world, high-pressure environments.

I work closely with engineering and product teams to design scalable, reliable, and performant experiences, often under constraints like offline mode, latency, and hardware limitations. My approach combines systems thinking, user-centered design, and technical understanding to deliver solutions that are both usable and feasible.

Experience

Zebrands | UX/UI Product Designer UX/UI

10.12.2024-15.02.2025

- Led the redesign of core timing-sensitive flows: catalog, checkout, payments, and after-sales operations.
- Supported a major shift to offline-capable architecture and improved performance, collaborating directly with engineering, backend, and business discussions.
- Contributed to the new Design System: color, spacing, typography tokens, and implementation guidance.
- Integrated Sentry for frontend performance insights and error tracking.
- Used Grafana and operational KPIs to identify friction, optimize load times, and speed up cart-building on tablets.
- Adapted the POS experience for both Mexican and Brazilian markets (language, taxes, operations, UX writing).

Insight One: Smart Payment Platform-U.S.A-UX/UI Designer.

02.2024-06.2024

- Led the complete redesign of a smart payment platform, from conceptualization to implementation, coordinating multidisciplinary teams across different time zones, ensuring timely delivery aligned with business objectives.
- Created the company's first design system, focusing on scalability and visual and functional
- consistency across all components, ensuring a uniform experience throughout the platform.
- Conducted usability testing and analyzed both qualitative and quantitative feedback, iterating on
- user-centered design solutions that significantly improved user experience and key interaction metrics.
- Coordinated agile iterations with distributed teams, optimizing the design and implementation
- process to ensure solutions were technically viable and aligned with strategic business goals.

Clue Case Study - UX/UI Designer.

06.2023-07.2023

- Collaborated closely with a peer to conduct an in-depth UX analysis of the Clue app, meticulously identifying areas for design and navigation enhancements.
- Spearheaded UI improvements by employing rigorous UX methodologies, including benchmarking, usability testing, heuristic evaluation, and user journey mapping.
- Engineered low, medium, and high-fidelity prototypes featuring interactive elements, subsequently subjecting them to user testing to facilitate iterative refinements.

PALM-Rescycle Startup-Colombia-UX/UI Designer.

03.2023 – 05.2023

- Revamped home and landing pages with a focus on circular economy principles and user-centric design.
- Completed weekly tasks within Agile and Scrum frameworks for consistent progress.
- End-to-End UX Leadership: Guided UX processes from research to prototyping, testing, and iterative refinement.
- Negotiation and Alignment: Negotiated alignment with user-focused design principles among Laboratoria, Product Owner, and Stakeholders.
- UX Writing Enhancement: Proposed and implemented UX writing improvements for user-centric language and seamless communication.

Locusroom Startup-Chile-UX Designer.

02.2023 – 03.2023

- Engineered an efficient and intuitive payment gateway for a travel app, leveraging Agile methodologies and adhering to strict weekly result delivery.
- Conducted comprehensive research, synthesis, and ideation phases, informing the creation of high-fidelity prototypes aimed at optimizing the user experience within the payment process.
- Utilized storytelling techniques to craft a compelling narrative around the payment gateway design, ensuring a seamless and engaging user journey that aligns with UX best practices.

Education

- Laboratoria
UX-UI Designer, Latam, 2023.
- Bachelor UAM
Social Communication, Mexico City, 2012.
- Bachelor UNAM
Political Science, Mexico City, 2010.

Certifications

- Accessibility and Inclusive Design|Platzi.
- Figma: Advanced Design Techniques|Platzi.
- Design Systems Patterns and Components |Platzi.
- Effective Design Systems| Platzi.
- Tech Webinar: Design and Development of Web 3 Digital Products|Nohbek.
- Information Architecture Course with Usaria|Platzi.

Core Skills

Product & UX

- User-Centered Design · Usability Testing · Rapid Prototyping
- UX Research · Interviews · Task Analysis · Accessibility
- UX Metrics: SLA · NPS · Task Time · Performance Debugging

UI & Systems

- Figma · FigJam
- Design Systems · Tokens · Atomic Design
- Responsive & Component-Based UI
- Integration Figma-MCP

UI & Systems

- Figma · FigJam
- Design Systems · Tokens · Atomic Design
- Responsive & Component-Based UI
- Integration Figma-MCP

Technical Collaboration

- Sentry · Grafana · Error Tracking · Frontend Monitoring
- Domain Modeling · Event Storming
- Engineering collaboration & handoff

Ways of Working

- Agile (Scrum/Kanban)
- Cross-functional collaboration
- Multimarket delivery (Mexico, Brazil, Germany, Venezuela, LatAm, U.S.)
- Remote-first / distributed teams

Languages
